Education

B.Sc. (Hons.) Physics

Sri Sri University

2023 -2026

- Current CGPA: 8.56 / 10.0
- Rank: 1st in Class

Skills

HARD SKILLS

- Lab: Gamma Spectroscopy, HPGe Detectors, Nuclear Electronics.
- Code: Python (NumPy), LaTeX
- Linux: (Kali/Ubuntu)
- Tools: ROOT, RadWare, BINDAS, WordPress.

SOFT SKILLS

- Public Speaking
- Project Management
- Documentation & Reporting
- Problem Solving
- Financial Awareness

Languages

- English
- Hindi
- Odia

About Me

Highly analytical Physics undergraduate with proven research experience at VECC, Kolkata. Adept at combining academic rigor with hands-on technical abilities in Python, Linux, and prototyping. Recognized for excellence in simplifying and presenting complex information, offering a versatile skill set that spans data analysis, project management, and cross-disciplinary problem-solving. Eager to leverage this diverse background to drive innovation in research, technology, or analytical environments.

Certifications & Awards

2nd Place, Seminar Presentation | Dr. Priyatama Deo Memorial Competition (2023)

- Awarded for excellence in presenting complex physics concepts to an inter-college audience.

Techniques for Future Energy Materials | O.P. Jindal University (Feb 2025)

- One-week workshop on material characterization and energy applications.

Academic Projects

Prototype Project

Light-Activated LED Automation | Dec 2025

- Developed a cost-effective prototype with potential for commercial application.

Personal Project

Build Journal (Web Dev) | Dec 2025

- Deployed a local WordPress server via XAMPP to document daily engineering logs and research findings.

Work Experience

Research Intern

Variable Energy Cyclotron Centre, Kolkata | May 2025 - July 2025

- Project: Characterisation of Detectors for Gamma-Ray Spectroscopy
- Analyzed the nuclear energy level structure of Indium-116 using thermal neutron capture data.
- Automated the energy calibration of HPGe and Scintillation detectors by writing custom Python scripts for quadratic fitting.
- Utilized RadWare and BINDAS software to generate Gamma-Gamma coincidence matrices, successfully identifying discrete energy states.
